

COIL TUBING INDICATOR SYSTEMS

Matherne Instrumentation's coil tubing indicator system is designed to give accurate weight readings for a coil tubing string in the wellbore.

The system is designed to be single or dual acting depending on the needs of the coil tubing unit.

The system includes 6" or 8.5" weight indicator, bracket, hose, and compression load cell.

FEATURES:

- 6" or 8-1/2" dial face with colorful custom logos
- Metric equivalents in Kgs and DaN
- Gauge is fluid-filled to ensure proper lubrication and shock resistance
- Load cells are equipped with a heavy-duty diaphragm rubber for long-lasting durability
- Available in a variety of configurations for all coil tubing applications
- Each system custom built to suit your application

ORDERING SPECIFICATIONS:

- Size of Indicator (single pointer only)
- Capacity of Indicator
- Ratio of Unit
- Single or Dual Acting System
- Length of Hose(s)

Coil Tubing Indicator and Compression Load Cells
